

How to Use Your MiraCell to Restore and Maintain Healthy Ears

- BEFORE** Cerumen (Earwax) Removal
Two to three days before appointment to have cerumen removed, drop a generous amount of MiraCell into your ear canal at bedtime every night.
- AFTER** Cerumen Removal
Continue to use MiraCell each at bedtime to help restore health to your ears.
- BEFORE** Your Hearing Aid Fitting Appointment
Every evening at bedtime, drop a generous amount of MiraCell into your ear, filling the ear canal. Tip your head slightly or lay your head on your pillow so the MiraCell contacts all of the ear canal. Put in cotton or tissue if you would like. Rest for 5-10 minutes to let the MiraCell go to work. Turn your head. Put MiraCell in the other side. Again rest 5-10 minutes to let MiraCell absorb.
- TO MAINTAIN** healthy ears, continue to use MiraCell in your ears at bedtime every night.
